HRMS Feature Inventory & Gap Analysis

Current capabilities of the Brainwave HRMS compared with leading HR platforms · October 2026

10	5	51
modules live today	features partly built	features missing

Part 1 — What's in the HRMS today

Derived from the backend routes, frontend pages and scheduled jobs in the codebase.

Core & access

- Login (JWT), forgot/reset password by email, first-run setup wizard with database connection test
- Three roles: Admin, Manager and Employee, with access checked by role
- Multiple organizations (create, edit, delete)
- Settings for departments, designations, leave types and employee ID format (auto-generated IDs)
- Public landing page

Employee management

- Employee directory with add, edit and delete
- Change an employee's role; find and fix duplicate employee IDs
- Profile page with profile picture and government ID upload (stored on AWS S3)
- Reporting hierarchy (each employee linked to a manager)

Leave management

- Apply for, edit and cancel leave, with a pre-submit check (balance, overlaps)
- Leave types: Casual, Sick, Earned and Unpaid
- Approval flow (manager or admin), pending queue and an all-leaves view
- Leave calendar for yourself and for each employee
- Leave policies, applied to one employee or to everyone
- Automatic monthly leave credit (cron on the 1st, January reset), plus manual runs, a simulator and logs
- Admin balance editing (single or bulk) with an adjustment log

Comp-off (time off in lieu)

- Request, manager approval, then admin grant
- Comp-off balance and records; use the balance as leave

Attendance

- Admin marks attendance in a grid: per cell, in bulk, or a whole day at once
- Statuses: present, absent, half-day, leave, holiday
- Monthly summary and Excel export

Holidays

- Holiday calendar, including holidays that repeat every year
- "Is this date a holiday" check and an upcoming-holidays list

Payroll

- Salary templates and a salary structure for each employee
- Salary slips sent by email (basic and detailed)
- Payroll report per employee and a monthly payroll summary
- Some PF, ESI and TDS fields referenced, but no full statutory calculation engine

Reimbursements

- Employees submit, edit and track expense claims
- Admins approve or reject claims and see stats

Notifications

- In-app notification bell (unread count, mark as read, delete and restore)
- Email notifications
- WhatsApp notifications via Baileys and Twilio, with connect/disconnect and a test message
- Settings for which notifications go out

Reports & dashboard

- Dashboard with stats and recent leaves
- Leave reports with filters and a preview

Part 2 — Features leading HR software offers

Each feature is marked **Missing** (not built) or **Partial** (some groundwork exists).

1. Core HR & employee lifecycle

Onboarding checklists (documents, assets, welcome tasks, offer-letter e-sign)	Missing
Offboarding: exit workflow, full and final settlement, exit interviews, asset recovery	Missing
Employee document vault (offer letters, contracts, certificates, expiry alerts); government ID exists today	Partial
Letters generated from templates (offer, appointment, experience, relieving)	Missing
Job history: promotions, transfers, salary revisions, probation and confirmation	Missing
Visual drag-and-drop org chart; hierarchy data exists today	Partial
Employee self-service for updating details, with HR approval	Missing

2. Time & attendance

Employees clocking themselves in and out (web or mobile)	Missing
Clock-in by location or selfie; biometric and RFID device integration	Missing
Shifts and rosters (rotating shifts, night shifts, week-offs)	Missing
Late-arrival and early-exit rules, grace periods, overtime calculation	Missing
Attendance correction requests	Missing
Timesheets and project time tracking	Missing
Work-from-home and on-duty requests	Missing

3. Leave (advanced)

Carry-forward and encashment rules, maximum balance caps	Missing
More leave types: maternity, paternity, bereavement, restricted/optional holidays	Missing
Rules that skip weekends and holidays when counting leave days (sandwich rules)	Missing
Multi-level approval chains and delegating approvals while away	Missing
Team calendar showing who's out	Missing

4. Payroll & compliance (India)

Statutory calculations: PF, ESI, Professional Tax, LWF, TDS (old and new regimes)	Partial
Investment declarations and proof submission (80C, HRA etc.)	Missing
Form 16 and PF/ESI filing data (ECR files, challans)	Missing
PDF salary slips downloadable from an employee portal	Missing
Loss-of-pay deducted automatically from attendance	Missing
Salary advances and loans with EMI deductions	Missing
Bonuses, arrears, variable pay, gratuity calculation	Missing
Bank transfer files for paying salaries	Missing
Payroll run locking and approval before payout	Missing

5. Recruitment (applicant tracking)

Job requisitions and postings (careers page, job board integration)	Missing
Candidate pipeline (Kanban) and CV parsing	Missing
Interview scheduling and scorecards	Missing
Offer management; convert candidate to employee in one step	Missing

6. Performance & growth

Goals and OKRs, KRAs and KPIs	Missing
Appraisal cycles: self, manager and 360-degree reviews	Missing
Continuous feedback, 1:1s, recognition and kudos	Missing
Performance improvement plans (PIPs)	Missing
Learning management: courses, certifications, skill matrix	Missing

7. Engagement & communication

Announcements and a company news feed	Missing
Birthday and work anniversary greetings	Missing
Surveys and pulse checks (including eNPS)	Missing
Polls, suggestion box, anonymous grievances	Missing
Policy documents with "I have read this" acknowledgement	Missing

8. Assets & expenses

Asset management (laptops, ID cards) assigned to employees	Missing
Expense policy limits, travel requests, per-diems, receipt OCR; basic claims exist today	Partial

9. Analytics

Headcount, attrition, hiring and diversity dashboards	Missing
Attendance and leave trends, payroll cost analytics	Missing
Custom report builder and scheduled reports	Missing
Exports across all modules; only attendance exports to Excel today	Partial

10. Platform & security

Mobile app (or PWA)	Missing
Single sign-on (Google or Microsoft) and two-factor authentication	Missing
Fine-grained permissions (custom roles beyond the three)	Missing
Audit trail of who changed what	Missing
Integrations: Slack/Teams, Google/Outlook calendar, accounting tools (Tally, Zoho Books)	Missing
Public API and webhooks	Missing
Multiple languages and currencies	Missing
AI assistant (HR policy chatbot, summarized reviews)	Missing

Part 3 — Suggested next steps

Ordered by impact for an Indian SMB HRMS.

1. **Employee clock-in/out with shifts**
   Attendance is currently entered by an admin, which won't scale.
2. **Statutory payroll and PDF salary slips**
   With loss-of-pay deducted automatically from attendance.
3. **Onboarding and offboarding workflows**
   With a document vault.
4. **Leave carry-forward, encashment and weekend/holiday rules**
5. **Performance reviews and goals**
6. **Announcements, birthdays and a mobile-friendly PWA**
   To drive day-to-day adoption.
