Transforming Workplaces

September 2026

Overview

HRMS is a web-based HR management system that runs employee records, attendance, leave, comp-off, expense claims, payroll and notifications in one place. Access is role-based, with three levels: Admin, Manager and Employee. The table below shows what each role can do. The rest of this document describes each module.

Capability	Admin	Manager	Employee
Dashboard	●	●	●
Employee directory & hierarchy	●	Own team	—
Add / edit employees, organizations	●	—	—
Attendance marking & export	●	—	—

Submit reimbursements	—	●	●
Process reimbursements	●	—	—
Payroll & salary slips	●	—	—
Reports & CSV export	●	●	—
Notification settings	●	—	—
Self-service profile	●	●	●

01 Authentication & Access

Available to: All users

- Secure email and password sign-in with token-based sessions and automatic sign-out on expiry.
- Self-registration for employees and managers; an employee ID and opening leave balances are assigned automatically.
- Welcome email to new users and a new-joiner alert to the admin.
- Forgot-password flow with a time-limited, single-use reset link sent by email.
- Three role levels (**Admin**, **Manager**, **Employee**). Each role sees only the menus and data that apply to it.
- Managers can see and act on their own reporting team only.

02 Dashboard

Available to: All users

- Admin view: total headcount, pending approvals and leaves approved this month.
- Manager view: team size and pending team approvals.
- Personal leave balances (Casual, Sick, Earned) and recent leave activity for every user.

03 Employee Management

Available to: Admin, Manager (own team)

- Employee directory with search and filters for department, role and organization.
- Add and edit employees: contact details, department, designation, joining date, reporting manager, organization and salary.
- Change an employee's role (Employee, Manager or Admin).
- Custom employee ID format with a configurable prefix and starting number.
- Organization hierarchy view grouped by department, from Admin to Managers to Employees, with team counts.
- Multiple organizations, each with a name, description and logo, and employees assigned to them.

04 Employee Self-Service Profile

Available to: All users

- View employee ID, department, designation, joining date, reporting manager and all leave balances.
- Update name, department, designation and phone number.
- Upload a profile photo.
- Upload a government ID document (Aadhaar, PAN, Passport, Voter ID, Driving License) as an image or PDF, stored securely in the cloud.
- See comp-off credits: granted, used, remaining and expiry dates.

05 Attendance

Available to: Admin

- Monthly attendance grid for all employees, with one-click status per day: Present, Absent, Half-day or Leave.
- Bulk editing: changes are highlighted until saved together.
- “Quick mark all” sets the status for every employee on a given day.
- Holidays are highlighted and locked automatically.
- Per-employee totals for present, absent, half-day and leave days.
- Export monthly attendance to Excel (.xlsx) with holiday markers and summary columns.

06 Leave Management

Available to: All users (apply); Manager and Admin (approve)

- Apply for leave on multiple, non-consecutive dates chosen from a calendar.
- Choose the leave type for each date, and full day or half day (first or second half).
- Balance checks while applying, visible holidays, and a warning for back-dated requests.
- The leave policy is applied automatically: advance-notice warnings, rules on combining leave types, and blocks for insufficient balance or holiday dates.
- **Two-level approval**: the manager approves first, then the admin gives final approval, with optional comments at each step.
- Balances are deducted on approval and refunded automatically if the leave is rejected.
- Personal leave history showing status and the full approval trail.
- Admin view of all leaves, with search, status and type filters, date edits and cancellation.

07 Leave Policy & Balances

Available to: Admin (configure); Manager (view)

- Configure each leave type: annual quota, monthly or annual crediting, advance notice, carry-forward limit, encashment, combination rules and unlimited leave.
- Default leave types: Earned, Sick, Casual and Unpaid. Policy changes can be applied to all employees in one step.
- Leave balance view for each employee, with a monthly leave calendar.
- Manual adjustments in half-day steps, with a mandatory reason. The employee is notified.
- Bulk tools: initialize balances, run the monthly leave credit, and add, deduct or set balances for many employees at once.

08 Holiday Calendar

Available to: All users (view); Admin (manage)

- Company holiday calendar with public, optional and restricted holiday types.
- Add, edit and remove holidays.
- Set recurring weekly offs (for example, every Saturday) for a month or a whole year.
- Holidays are applied automatically in leave requests, attendance and comp-off.

09 Compensatory Off (Comp-Off)

Available to: Employee and Manager (request); Manager and Admin (approve and grant)

- Request comp-off for a day worked, as a half or full day, with a reason. Duplicate requests are blocked.
- Managers approve their team's requests. Admins approve all requests, including those from managers.
- Managers and admins can grant comp-off directly (0.5 to 5 days).
- Approved comp-off is added to the leave balance, can be taken as “Comp Off” leave, and expires after 90 days.
- Summary of earned, pending, used and available comp-off.

10 Reimbursements

Available to: Employee and Manager (submit); Admin (process)

- Submit expense claims with a title, category, amount, date, description and an optional bill (image or PDF).
- Ten categories, including Travel, Food & Meals, Accommodation, Equipment, Software, Training and Medical.
- Edit or withdraw a claim while it is still pending.
- Admin workflow: approve or reject with remarks, then mark approved claims as paid (“Cleared”).
- Bulk actions, search and filters, with total-amount summaries.

11 Payroll

Available to: Admin

- Salary template: set the earnings and deductions components and their order (for example, Basic, HRA, DA, PF, Professional Tax and TDS).
- Salary structure for each employee: enter the monthly CTC and the components are calculated automatically. All values can be edited.
- Fixed or percentage-based deductions, plus automatic deductions for unpaid leave (full and half day).
- Email salary slips, detailed or simple, to one employee or to all employees at once.
- Monthly payroll summary covering payable days, unpaid days, deductions and net pay, with CSV export.

12 Reports

Available to: Admin, Manager

- Leave report filtered by month, department, organization, employee and status, with totals.
- Export reports to CSV.

13 Notifications

Available to: All users; Admin (configure)

- In-app notification bell with an unread count, mark-as-read, delete, and links to the related item.
- Automatic emails for registration, leave requests and decisions, leave edits, comp-off approvals, salary slips and password resets.
- WhatsApp notifications through Twilio or a linked WhatsApp account (connected by scanning a QR code), with a test message option.
- Admins choose which events trigger WhatsApp alerts.

14 Platform

Available to: All users

- Installable Progressive Web App (PWA) for desktop and mobile, with home-screen shortcuts.
- Responsive design with a mobile-friendly slide-out menu.
- Documents and uploads stored securely in the cloud (AWS S3).
- Public landing page with sign-in and registration.
